Edward Wadie Said (1 November 1935 – 24 September 2003) was a Palestinian-American philosopher, academic, literary critic, and political activist. As a professor of literature at Columbia University, he was among the founders of post-colonial studies. As a cultural critic, Said is best known for his book *Orientalism* (1978), a foundational text which critiques the cultural representations that are the bases of Orientalism—how the Western world perceives the Orient. His model of textual analysis transformed the academic discourse of researchers in literary theory, literary criticism, and Middle Eastern studies.

Reasons for the evolution of the catalogue

- Respond effectively to the upgrade of BIBFRAME from 1.0 to 2.0
- By-pass the actual data transformations, namely going through MARC21
 - most of the libraries in our LOD catalog use UNIMARC in their LSPs
- A more complex structure, to enhance informations that we potentially have in the records (publishers, subjects, provenance, etc.)
- A cleaner, easier-to-navigate UI to enhance discovery functions
- A dedicated Linked Data Editor
