

Release Notes

Share Family software version 4.0.0 - SNAPSHOT_001.

Document Number: REL-4.0.0 - SNAPSHOT_001.

This edition applies to Share Family software Version 3.1.1, Release 4.0.0 - SNAPSHOT_001.

The release encompasses the following components of Share Family [LOD Platform technology](#) framework: Cluster Management Module (component managing the clusters of entities), API layer, Moonlight (front-end module), RDBMS (database), RDFizer (BIBFRAME / RDF conversion module). This release addresses both bug fixes and new developments (enhancements).

The software versions released over time are shared across all layers of [Share Family initiative](#)'s technology.

For an overview of the software versions installed on the different environments, see [Share Family AWS environments summary](#).

Implementations described in this document are identified by an ID (eg. SVDE-8871) and a title. Highly technical details, not relevant for end users, are not included in this document.

Further information on descriptive tasks corresponding to implementations can be found in the [Jira portal](#), accessible to member institutions.

Release notes are published on the wiki [Release notes - ShareDoc PublicDocumentation](#).

For more information on the LOD Platform technology, consult the public documentation available on the wiki page [Public Documentation](#).

If you have any comments on this publication, please send them to info@share-family.org.

1 General notes

1.1. Contents

This document lists and briefly describes the main enhancements and fixes that are implemented for this release.

Being a major release, several important features and upgrades to components have been added to the system, ie. infrastructure, delta updates processes, and JCricket entity editor, the platform's shared cataloguing tool. A short description of each is included in the corresponding section.

1.2. Installation notes

This release of Share Family software version 4.0.0 - SNAPSHOT_001 involves changes to the latest published version of the software 3.1.1.

2 Solved Bugs

2.1. Cluster Management Module

- **SVDE-9999 Managing roles with code m21 also for unimarc institution**
Some institutions that send their data in Unimarc use the role codes of MARC21 (LOC codes). Modify the parsing so that role codes expressed in MARC21 are also accepted for Unimarc records.
- **SVDE-10062 Original work with no relationships**
On uat.svde.org, some Original works have no related Publications, nor related Subjects.
- **SVDE-10063 Exclusion of some strings in Publishers clusterization**
On uat.svde.org, there are some Publishers with the string [publisher not identified]. It's necessary to exclude some useless string from tags 260/260 (subfield \$b) during clusterization of Publishers.
- **SVDE-10073 Series with "Original work with unknown title"**
On uat.svde.org, there are some Opus series with "Original work with unknown title".
- **SVDE-10107 Unimarc - Manage skip in filing characters in instance title**
In the instance title all the characters of the title must be present including the article, unlike in the opus title where the skip characters in filing are currently excluded.
- **SVDE-10109 [UAT test] Deleted record shown on the portal**
On uat.svde.org, there are present some records whose status is deleted, but the all entities (Opus, Work, Instance, Agent and subjects) that have been created from this record are still visible. They shouldn't be visible, since they are only linked to these deleted records.
- **SVDE-10178 [UAT test] Duplicate Agent entities**
On uat.svde.org, two separate agents were created, even if they express the same Organization. They haven't been reconciled because they present two different forms of writing "and".
- **SVDE-10510 isLeader management for multivalued attributes**
Currently, the "Instance" entity does not properly handle multi-valued attributes for column isLeader
- **SVDE-10521 Opus title not completed**
On uat.svde.org, there are some Opus titles with a string not completed.
- **SVDE-10585 Revision of some labels with incorrect diacritics**
Sometimes the diacritics were not saved correctly (especially the Norwegian ones).
- **SVDE-10763 Remove spaces in the normalized form of the title**
During clusterization process, the system has to remove spaces in the normalized form of the Instance title.

- **SVDE-10921 FullName saved with round brackets**
During clusterization process, the FullName attribute is saved in the CKB with parentheses.
- **SVDE-11048 Unsuccessful reconciliation of modified Instances after delta**
During DELTA process, the system correctly creates new records from the delta, however, it fails to properly update existing ones and also fails to delete records marked as deleted.
- **SVDE-11144 Delta process generates duplicate opus for “Opus No Author” case instead of updating the existing one**
When clustering first using the Bib Manifestation Title process and then processing the modified record through the Delta process, the system incorrectly generates a second opus.
- **SVDE-11362 NatBib staging clusterization issue**
During DELTA process, a wrong author was not unlinked from an Opus entity.
- **SVDE-11277 Opus returns 404 error (UAT NatBib)**
On uat.natbib-lod.org, the Opus “Tuntematon sotilas” returns a 404 error.

2.2. API

- **SVDE-10404 Entity locked for a long time after editing in JCricket**
On test.svde.org, entities result locked (aka still in editing) many hours after the last edit, or even if the user just opened them in JCricket without changing anything. This prevents other users from deleting or merging the locked entity.
- **SVDE-10785 Newly created Instance and Agent not visible on dev environments**
During testing on both dev.pcc-lod.org and dev.sharecatalogue-lod.org, newly created Instances and Agents are not visible on the platform after being created with JCricket.
- **SVDE-11147 Instance with has_instances=false is displayed on uat.natbib-lod.org**
On uat.natbib-lod.org, that the system correctly creates new records from the delta, however, it fails to delete records marked as deleted.
- **SVDE-11189 Implement Attribute Label Filtering Based on Browser Language Using ISO3 Codes**
To correctly filter attribute labels according to the browser’s selected language, we need to adjust the current language-resolution logic.
- **SVDE-11239 Work not associated with its Instance (NatBib UAT)**
On uat.natbib-lod.org, some Instances are not associated with the related Series.

2.3. Moonlight (front-end module)

- **SVDE-9373 Wikidata queries fail**
On certain environments Wikidata queries fail. When the query fails a fallback description based on cluster data is used instead of Wikipedia summary.
- **SVDE-10108 SHARE CATALOGUE is not displaying subjects**

All skins on SHARE CATALOGUE should display subjects, but at this moment the Subjects are not shown.

- **SVDE-10158 Internationalisation not working for wikidata descriptions**
When browsing the platform in a given language, fetch description from the wikipedia page and from Wikidata in the same language as the user is browsing. If there is no content in that language, fall back to local data.
- **SVDE-10571 It's not possible to edit an entity in Share-Catalogue environment**
On <https://www.sharecatalogue-lod.org/>, the user can't edit an entity after the login in JCricket.
- **SVDE-10583 The filter "Publication year" doesn't work well**
The 'Publication year' filter doesn't work well in the Series of Original Work entities.
- **SVDE-10591 Search filters: it should only be possible to select each item once**
Each facet item should only be available for selection once.
- **SVDE-10602 Advanced search for Person doesn't work if I add a second index**
The Advanced search for Person doesn't work if the user adds a second index.
- **SVDE-10605 The menu for adding an opus to a merge list is partly hidden**
In some cases, the menu for adding an opus to a merge list is partly hidden.
- **SVDE-10609 Don't translate the boolean operators**
In the advanced search the menu with the two boolean operators AND, OR are translated in italian (If you have set the italian language from Options), but they must remain in English.
- **SVDE-10613 The search for Language doesn't work (Advanced search)**
In the advanced search, the publication index doesn't work. The selected language does not appear to be considered in the search.
- **SVDE-10689 Wrong label for Target audience (1121)**
The label to add the attribute for Target audience (1121) is not correct. At the moment it is displayed as "Intended audience", but it should be "Target audience".
- **SVDE-10693 Wrong behaviour of Language filter on dev.sharecatalogue-lod.org**
The language filter on <https://dev.sharecatalogue-lod.org/> is behaving incorrectly. Specifically, the language labels are not visible, while the counters are visible. This behaviour happens whenever the language filter is available on the platform.
- **SVDE-10747 Allow creating a new Provision Activity from a relationship input dropdown in Instance form**
Manage the creation of a new Provision Activity starting from the "Publication activity" relationship field in each Instance's form.
- **SVDE-10748 Add "...and {N} more" in the Contributors list on Publication page**
The "Contributors" list in Publication's section is incomplete when there are more than 10 contributors.

- **SVDE-10766 Prism title in edit state bug**
In Simple search result list, if an entity is being edited and the user is logged in, the title of the entity does not get displayed.
- **SVDE-10787 Values for 2 attributes shown as “Entity with unknown name”**
The attribute Intended audience (linked to the Opus) and the attribute Media type (linked to the Instance) are currently displaying as Entity with unknown name instead of showing the correct values.
- **SVDE-10856 Missing authentication check for showing prism status indicators**
The status icons for an entity are meant to be displayed only to authenticated users.
- **SVDE-10862 No reviewer for merge action**
On <https://www.sharecatalogue-lod.org/>, it's not possible to add a reviewer for the merge requests because the system doesn't give a list of reviewers.
- **SVDE-10873 Fix the "published in {place}" string in entity description**
At <https://uat.natbib-lod.org/search?q=the&show=publication> the descriptions for entity results are incorrectly formed.
- **SVDE-10880 Empty pane still open after opening an entity in JCricket from entity page**
Close the empty pane (if open) when opening an entity in JCricket from entity page.
- **SVDE-10894 Language input in JCricket doesn't fetch list of language options**
Starting to enter a language name in the language input field doesn't fetch the list of options.
- **SVDE-10911 Incorrect behaviour of IsLeader on multivalue attributes**
For most multivalue attributes currently all values are automatically set as IsLeader and it's not possible to deselect specific values.
- **SVDE-10912 Incorrect behaviour of IsLeader on Contributors attribute**
In the Contributors section we can have the same agent linked to the instance/work/opus with two or more different roles. Currently It's possible to associate the value IsLeader only to one of these roles, instead it would be possible to set both.
- **SVDE-10944 Natbib: incorrect label on buttons leading to publication resources**
On <https://uat.natbib-lod.org>, the “call to action” buttons leading to the publication resource incorrectly say “Explore the BNB at the British Library” when the resource doesn't come from BNB.
- **SVDE-10945 Norwegian translation strings for Natbib**
When Norwegian translations are incomplete in UI, auto-translate the missing Norwegian translation strings.
- **SVDE-10952 Contributors table misaligned when editing multiple entities**
On JCricket, when editing more than one entity at a time, the Contributors table layout becomes inconsistent if one of the entities has a long URI. Columns appear misaligned compared to other entities' tables.

- **SVDE-10973 Fix the missing www from Taiwan main portal and UAT portal URLs**
The URLs <https://ntu-lod.org> and <http://uat.ntu-lod.org/> have to work without www in the URL string.
- **SVDE-10977 Problem selecting "Latin" as language of Work**
On uat.natbib-lod.org, when the user tries setting the language of a Work as "Latin", the language doesn't appear in autosuggestion.
- **SVDE-11010 Map FE locale codes to correct language codes used to fetch Wiki and backend data**
Update the language codes in order to connect the entity pages to the Wikipedia/Wikidata pages.
- **SVDE-11017 Error in automatic translation on uat.ntu-lod.org**
On uat.ntu-lod.org, an attribute `{{title}}` appears next to the Basic info label. This happens for an incorrect translation label.
- **SVDE-11019 Empty pane label on JCricket**
On JCricket the pane where the user can search for entities via URI and create new ones is called "Empty pane".
- **SVDE-11140 Correct wrong NTU name in the footer**
Since both National Taiwan University and Nanyang Technological University share the English abbreviation "NTU," this frequently causes confusion, so change the footer in the portal pages.
- **SVDE-11223 Language search in Editor doesn't return language list**
Trying to add a new language in the Editor by clicking "+" and searching for a language returns nothing.
- **SVDE-11251 Advanced search indexes don't work [UAT NatBib]**
In the advanced search for Original Work and Publication, the index Contributor doesn't work.
- **SVDE-11259 When a PA is updated, focus should immediately shift to the new PA**
Upon PA edit, when a newly created PA is loaded, immediately bring it into focus.
- **SVDE-11264 Metadata on Work page not displayed correctly (UAT NatBib)**
On <https://uat.natbib-lod.org/> (and the other UAT multitenant environments) the metadata present on the Work page is not displayed as a list, but on the same row, without spaces between each piece of metadata.
- **SVDE-11275 Contributor role not displayed in Provenance box (UAT NatBib)**
On JCricket (uat.natbib-lod.org) the role of Contributors on the Opus page is not shown in the Provenance box.
- **SVDE-11288 Impossible to review merge (UAT NatBib)**
On uat.natbib-lod.org, it's not possible to do the review of a merge action.
- **SVDE-11291 Inconsistent author info displayed on Opus page (UAT NatBib)**
On uat.natbib-lod.org, author information is inconsistently displayed on Opus pages in the portal.
- **SVDE-11344 Data loading freezes on MT environments**

On multitenant environments, starting from the Opus page if the user backs and forth between the “Publications of this” tab and the “BF:works” tab, the data loading in each tab freezes.

- **SVDE-11348 Bugged more option box**
On uat.natbib-lod.org, clicking on the “More options” button, the box opens but in order to see the Editor Option it’s necessary to scroll up quite a few times.

3 Enhancements

3.1. Cluster Management Module

- **SVDE-5189 [BNB] Creation relationship tag from LKR tag**
Management of local tags (LKR tags) in British Library bibliographic records.
- **SVDE-9505 Unreconciled Publisher incremental mechanism**
The Publisher clusterization has to be based on ISBN root. For Publishers with no ISBN root, an incremental mechanism is needed for the creation.
- **SVDE-9534 Management of internal db of Publisher starting from Casalini data**
The Publisher clusterization has to be based on ISBN root. In order to apply this mechanism, it's needed to create a ISBN db starting from Casalini data.
- **SVDE-9769 New clusterization of the svde:Work using also Contributor (Agent)**
The svde:Work clusterization has to be based on Contributors, in addition to the other criteria.
- **SVDE-9920 svde:Work: management of multi-languages from bibliographic record**
It is required to create a svde:Work using the languages reported in the bibliographic record. The creation of one or more svde:Works is based on presence of one or more languages
- **SVDE-9922 svde:Work language management for Series and Added entry titles**
Currently, when a Series or Added-Entry titles are clustered, the language of the svde:Work is retrieved from tag \$l 130/240 or from tag 008. With the new multi-language management, the creation of the svde:Work associated with Series or Added-Entry titles must only consider the language from tag 008 pos. 35-37.
- **SVDE-9979 Item management UNINA (Università degli studi di Napoli Federico II) - unimarc**
Management of items for UNINA library (unimarc).
- **SVDE-10056 Manage the Opus_type vocabulary**
Management of the new vocabulary Opus type, starting from the rules defined by SEI WG.
- **SVDE-10079 Item management UNISALERNO**
Management of items for UNISALERNO library.
- **SVDE-10164 Update of holding mapping for Stanford in SVDE**
New management of items for Stanford library.
- **SVDE-10194 Manage attribute Media e Carrier for print books**
Management of the missing values for Media and Carrier attributes in UNIMARC bibliographic records.

- **SVDE-10229 Add attributes for Meeting (111, 711, 811, 611)**
Management of the attribute SUBORDINATE UNIT, JURISDICTION NAME and MISCELLANEOUS INFORMATION for Meeting entity, as separate attributes.
- **SVDE-10272 Management of - instead of blank value**
Management of - instead of blank value for UNIMARC bibliographic records.
- **SVDE-10463 Share-Catalogue: manage MARC21 records for electronic resources**
Management of MARC21 bibliographic record related to electronic resources for UNINA and UNISA libraries.
- **SVDE-10464 Modify management of tag 106 in UNIMARC record**
Update the management for the tag 106 in UNIMARC records, on the basis of new rules.
- **SVDE-10509 Update the mechanism to retrieve qualifier for "sameAs" and "link" in JCricket**
Management of the URIs qualifiers for external URI in JCricket.
- **SVDE-10524 Opus type rules for Marc21 records**
Management of Opus type starting from MARC21 records.
- **SVDE-10560 Opus type rules for UNIMARC records**
Management of Opus type starting from UNIMARC records.
- **SVDE-10607 Manage 7XX tags for NLN**
Management of tags 7XX NameTitle (\$a \$t) for NLN bibliographic records.
- **SVDE-10608 Author contribution for Works**
Currently, for the tags tag 7XX/8XX Name/Title (\$a \$t) the Agent is associated only to Opus entity, but it's necessary to associate the Agent also to svde:Work.
- **SVDE-10769 None association for more VIAF IDs during clusterization process**
During clusterization process some Agents can be associated with more than one VIAF IDs. In this cases, the VIAF IDs don't have to be associated to these Agents.
- **SVDE-10770 Check of the new opus type**
Update the Opus type controlled vocabulary.
- **SVDE-10771 pusType: manage tag 336 without subfield \$b**
In some cases, the tag 336 is without the subfield \$b (Content type code). It is necessary to convert the string (description) present in \$a of tag 336 in its code (\$b) in order to map the right OpusType.
- **SVDE-10772 Manage the OtherOpus and UnspecifiedOpus**
For Opuses with OtherOpus/UnspecifiedOpus, if in the clusterization process the Opus is more specific, these two values have to be removed as Opus type.
- **SVDE-10819 Update values GenreForm vocabulary**
Add some missing values from the GenreForm vocabulary
- **SVDE-10863 Changes for svde:Work and Instance attributes**
Change the management of some attributes for the svde:Work and the Instance entities.
- **SVDE-10877 New update controlled vocabulary sheets**
Update the SVDE controlled vocabulary in order to manage Arabic labels.

- **SVDE-10883 Manage tag 024 with external source for authority records**
Management of the tag 024 as external source for Agent entities.
- **SVDE-10902 Item management NTU library (Taiwan)**
Management of items for NTU library.
- **SVDE-10965 Creation of new attributes for the Publication statement**
Management of the single attributes string for the Publication statement.
- **SVDE-11025 Authority MARC21 enrichment**
Enrichment of MARC21 authority records with external IDs.
- **SVDE-11229 Tag 260/264 exclusion**
Exclusion of some string from clusterization process for tags 260/264, subfield \$b.
- **SVDE-11230 Local tags management for Brandeis**
Management of local tags for Brandeis library.
- **SVDE-11255 Brandeis holdings data clusterization**
Management of items for Brandeis library.
- **SVDE-11258 Management of Publication Statement**
Management of the new attribute Publication Statement
- **SVDE-11299 Activation of PALCI tenant in clustering-module**
Configuration of PALCI tenant in clustering module.
- **SVDE-11363 Change value for "Record status" vocabulary**
For the "Record status" controlled vocabulary, it's needed to change the value "prepublication" in "upgraded prepub".
- **SVDE-11400 Creation of PALCI items**
Management of items for PALCI consortium.

3.2. API

- **SVDE-10137 Title management on JCricket**
Manage the attribute Title for bf:Work in JCricket and enable the search for title.
- **SVDE-10788 URI property and description API**
For each property is it possible to have the URI of the property and the description of the property.
- **SVDE-10854 Change to a PA block propagates on all Instances**
Be able to change data in a PA block in a way that such change propagates on all the Instances that use the same PA.
- **SVDE-10950 Change the value of some properties (from single-value to multi-value)**
Some attributes in JCricket are single-value, but they have to be multi-value.
- **SVDE-10966 Creation of the API to fetch Publication statement**
To manage publisher data according to RDA guidelines, we need to add some specifications to the Provision activity entity created or modified starting from an instance.
- **SVDE-10974 Provision activity with different provenances (in JCricket)**

Currently, in JCricket it's not possible to add a provision activity origin to a different origin than the institution that created it.

- **SVDE-11374 Problems with Stanford OPAC permalink**
Wrong configuration for the Stanford OPAC permalink.

3.3. Moonlight (front-end module)

- **SVDE-8507 Publication filter British Library**
Enable some Publication filters only for British Library.
- **SVDE-8641 Sidebar hiding**
It should be possible to hide and show the sidebar on the editor.
- **SVDE-8959 Privacy policy and terms of use pages**
Add privacy policy page and add terms of use page.
- **SVDE-9469 Display editing status on J. Cricket and entity pages**
When an entity is being edited a banner should indicate the entity is being edited and the user who is editing.
- **SVDE-9552 On 404 entity pages, try to load data in a client-side request to display invalidated entities to editors**
Display invalidated entity data in an entity page for authenticated users (instead of a 404 page), but make it clear that it has been invalidated.
- **SVDE-9557 Add copy URI buttons to J. Cricket**
Whenever an entity is open in J. Cricket there should be a button to quickly copy the (full) URI.
- **SVDE-9558 Add copy icon to entity page**
Add a new icon indicating that something was copied to the clipboard. This icon should be used on the copy button on entity pages.
- **SVDE-9806 Loading of the new Opus types defined by the SEI WG**
Display of the opusType under the title of the OPUS, considering the new values indicated by SEI WG.
- **SVDE-9932 Improvements to authenticated header (frontpage)**
Currently on the frontpage any other options than searching are moved to the bottom (i.e. switch site, options, log in). Emphasise the search functionality.
- **SVDE-10132 Set up main SHARE CATALOGUE portal**
Add main SHARE CATALOGUE skin on <https://sharecatalogue-lod.org>.
- **SVDE-10146 Retrieving Instance publisher and publication place from the new Provision Activity entity**
Retrieve publisher(s) and publication place(s) from the new Provision Activity entity on Instance and display the Provision Activity data.
- **SVDE-10471 Update property labels**
Update the label of some property for JCricket visualization
- **SVDE-10476 Creating, editing and linking Provision Activity in editor**
Each Instance can have multiple relationships to different Provision Activity entities. Each Provision Activity relationship needs to properly display the values in that PA entity.
- **SVDE-10561 Related bf:works in Publication tables**

In the “Publications by” table on the agents entity page there should be a column displaying related bf:works.

- **SVDE-10582 instead of the full name**
Selecting the button “Available at ...” the user sees all libraries that have a copy of the entity publication. That menu must display the full name of the libraries (as it is now for ‘Università degli Studi di Napoli Federico II’) and not the code.
- **SVDE-10614 Change KFNL portal name**
When users select Arabic as the portal language, the header of the portal should not be “KING FAHAD NATIONAL LIBRARY”, but the Arabic name of the library.
- **SVDE-10649 Create dropdown for source description to the publication page**
A “View source description” dropdown for library professionals and related researchers will allow these users to access various source formats of the record.
- **SVDE-10655 Reinstate restriction on deleting attributes with IsLeader flag**
Previously, it was not possible to delete an attribute if it had the IsLeader flag set. However, for some reason now this is possible and it’s creating an issue.
- **SVDE-10691 Updated Arabic translations for info pages**
Arabic translations of about pages on <https://kfnl.preview.share-family.org/> have been reviewed by KFNL staff.
- **SVDE-10716 Shorten list of metadata on publication page**
Display only selected featured metadata on the publication page and hide any remaining fields and make them available with a “show more” button.
- **SVDE-10724 Create new test portal for Natbib**
Before switching Natbib tenant to the most advanced version of the software, a test portal should be created.
- **SVDE-10749 Publishers in Publication statement list in Publication page should be hoverable links**
Publishers listed in Publication statements should be hoverable links.
- **SVDE-10757 Every change in the PA returns a new ID**
Implement a mechanism that keeps the Publication statement in a draft state, in order to avoid new ID is generated every time a Publication statement is modified in JCricket.
- **SVDE-10797 Correct typo and links on <https://bl.natbib-lod.org/about/about-the-british-national-bibliography>**
Correct some information and links in NatBib portal.
- **SVDE-10808 Enable Arabic and load translations to QNL portal**
Enable Arabic and load translations to QNL portal.
- **SVDE-10855 Enable to un-flag IsLeader value for Provision Activity block**
The user should be able to un-flag the leader button in the same way as it works for other multi-value fields.
- **SVDE-10865 Allowing advanced users to apply changes to all Instances that own a PA**

Advanced users in Editor should be able to change data in Publication activity in a way that such change propagates on all the Instances that use the same PA prism.

- **SVDE-10905 Remove line from and natbib-lod.org/about/what-is-bibframe bl.natbib-lod.org/about/what-is-bibframe**
Remove a wrong sentence about Items in the About page for NatBib environment.
- **SVDE-10922 Changes for some Instance attributes in JCricket**
Changes for some Instance attributes in JCricket.
- **SVDE-10967 Creation of new attributes related to the Publication statement**
Add the section “Publication statement” to the Provision activity entity created or modified starting from an instance.
- **SVDE-10968 Changing the prism icon to indicate provenance**
Change the icon to indicate a provenance of the properties in JCricket.
- **SVDE-10970 Update the "Switch site" button label in non-English translations**
Update the "Switch site" button label in non-English translations.
- **SVDE-10975 Management of the provenance for multivalued properties**
For multivalued properties, the provenance must be accessed at the row level rather than from the icon next to the property title.
- **SVDE-10976 Display of the role term in the provenance window for Contributors**
In the provenance window, it's needed to display the role term associated with each Agent, in exactly the same way it is currently shown in the contributor section of the Instance.
- **SVDE-11004 Show URIs of properties in JCricket**
When a user is editing an entity (or more entities), beside each property it's needed to be able to see the URI property.
- **SVDE-11018 Editor page modifications - rearrange sections in empty pane**
Reorganize the Editor page in JCricket.
- **SVDE-11043 Enable downloading of enriched authority records**
Enable downloading of enriched authority records from the portal, in the same way it's already possible to download enriched bibliographic records.
- **SVDE-11051 Remove noisy attributes from the Publication page**
Some technical or internal fields should not be displayed on the Publication page, even when present.
- **SVDE-11053 Finnish translation strings for Natbib**
Translate NatBib's UI in Finnish and enable the Finnish UI option for Natbib.
- **SVDE-11076 Show less button on Publication page**
After clicking “Show more”, there should also be a “Show less” button to collapse the list back to the initial 5 items.
- **SVDE-11079 Publication page not showing expected attributes**
Management of missing attribute in Publication page.
- **SVDE-11081 On the Publication page, concatenate attributes into a Physical description label**

On the Publication page, concatenate extent, other physical details, dimensions, and accompanying material under a single label Physical description.

- **SVDE-11087 Set an order for core metadata on the Publication page**
Show with a specific order the core metadata on the Publication page.
- **SVDE-11160 Display of contributor contribution description**
Display the correct contributor roles in the entity page hero section.
- **SVDE-11166 Remove British Library e-mail from general Natbib portal**
Remove British Library e-mail from the general Natbib portal.
- **SVDE-11219 Show Work attributes on Publication page for unauthenticated users**
Unauthenticated users must be able to see Work attributes at a Publication level.
- **SVDE-11256 Require a confirmation from the user before deleting the last leader instance**
Allow the advanced editors to delete the last leader instance, but only after they confirm their intent through a modal window.
- **SVDE-11261 MARC record download from UAT multitenant env results in empty file**
On all multitenant environments it is impossible to download the MARC record on Publication pages.
- **SVDE-11320 Change text in footer of bl.natbib-lod.org**
Update the text in the footer of <https://bl.natbib-lod.org/>.
- **SVDE-11321 Improve datatype display on Property Details**
The values for datatype should be concise and meaningful to users.
- **SVDE-11323 Control layout of Property Editor**
The Property Editor should have a suitable max-width in line with recommendations for readability in terms of line-lengths.
- **SVDE-11324 Change text in footer of natbib-lod.org**
Update the text in the footer of <https://www.natbib-lod.org/>.
- **SVDE-11325 Display of the variant names of an Agent**
If the Agent has more than 5 variant titles, the system has to show the first 5 and the next ones through a link.
- **SVDE-11326 Display of the variant titles for entity OPUS**
If the Opus has more than 5 variant titles, the system has to show the first 5 and the next ones through a link.
- **SVDE-11333 In the property details dialogue remove URI for roles**
When displaying multiple contributor relationships, the property editor shows the URI of the first role. This is confusing when there are multiple relationships with different roles.
- **SVDE-11368 Set up skin portal for Stanford on UAT**
Creation of a new skin portal for Stanford in the uat.svde.org domain.

3.4. Infrastructure

- **SVDE-10235 Update OPAC link for UToronto**
Update OPAC link for UToronto

- **SVDE-10578 UNICAS catalog has not been loaded in Share Catalogue**
UNICAS data has not been loaded in Share-Catalogue.
- **SVDE-10742 Fetch NLN authority records for Natbib from OAI-PMH**
Collect a dump of NLN authority records from NLN OAI-PMH endpoint.
- **SVDE-10744 Load NLN test records to UAT portal for Natbib**
Before switching Natbib tenant to the most advanced version of the software, a test portal should be created.
- **SVDE-10745 Load NLF test records to UAT portal for Natbib**
Before switching Natbib tenant to the most advanced version of the software, a test portal should be created.
- **SVDE-10798 Update OPAC endpoint for British National Bibliography**
The British National Bibliography has changed their OPAC endpoint.
- **SVDE-10849 Load subset of BNB records to UAT portal for Natbib**
Before switching Natbib tenant to the most advanced version of the software, a test portal should be created.
- **SVDE-10895 Load Taiwan records to UAT portal for Taiwan**
A subset of bibliographic and the full of authority records of Taiwan should be loaded into the UAT MT environment for Taiwan.
- **SVDE-11403 Change OPAC link for NLN in Natbib**
The current NLN OPAC link that points from uat.natbib-lod.org needs to be changed.
- **SVDE-11404 Change OPAC link for NLN in SVDE**
The current NLN OPAC link that points from svde.org needs to be changed.

3.5. RDBMS

- **SVDE-9363 Management of OPAC URL for Share Catalogue institutions**
We request to manage the URLs to connect Share catalogue platform to each OPAC.
- **SVDE-11205 Add the entry points for PALCI to the PALCI CKB database**
The PALCI tenant will be populated with data from many libraries, but the dataset that we will import will be a single bibliographic file including the records of all libraries.
