Line 1:

The activities of Share-VDE are **divided** into several work strands. Being a community initiative, the goals and desired outcomes are defined by the participating institutions through active engagement in different working groups. **The groups have regular meetings that are reported in the http://bit.ly/2020_SVDE_meetings annual meeting calendar**].

==SVDE Advisory Council (AC)==

Th
e Share-VDE Advisory Council's role is to provide insight and analysis of the MARC to BIBFRAME transformation to make recommendations for improvements based on member library data analysis, and project documentation. The AC also provides overall guidance to the activities of Share-VDE initiative and Working Groups.

Line 1:

{{DISPLAYTITLE:Share-VDE working groups}}

The activities of Share-VDE are **organised** into several work strands. Being a community initiative, the goals and desired outcomes are defined by the participating institutions through active engagement in different working groups **that meet on a regular basis**.

Share-VDE member libraries are welcome to join one or more working groups based on their interest in a specific work strand and on the active contribution they can bring to the discussion. To become a member of a working group, contact the chair or Share-VDE team at <mailto:helpdesk@share-vde.org> helpdesk@share-vde.org.

==SVDE Advisory Council (AC)==

The Share-VDE AC will take an active role in determining future uses and vision for the Share-VDE initiative; Develop future use cases for Share-VDE, and set development priorities as needed; Monitor and lead the work of the various Advisory Council Working Groups; Maintain communication among the Share member institutions.

==SVDE-AC Cluster Knowledge Base Editor working group (CKB editor)==

An essential part of the MARC to RDF conversion process is the maintenance of metadata that have been produced and registered on the Cluster Knowledge Base (CKB); the group analyses how libraries interact with the CKB and their use of the Editor for modifying (correcting / enriching), deleting, merging and separating clusters; the same approach will be applied on the data originally created in BIBFRAME.
